

Drenchers and Vaccinators

HIGHLY ACCURATE - NO WASTAGE.

NJ PHILLIPS

An accurate dose every time. Phillips precision products have administered over 30 billion accurate doses to animals across the world. Highly accurate - no wastage.

Designed and manufactured in Australia, Phillips products are built of the highest quality materials to withstand everything that farming conditions can throw at them.

The Phillips range gives reliable trouble-free operation in even the harshest conditions and has been trusted for generations by farmers worldwide.

A 20ml Auto Drencher

One of the most popular and accurate drenchers in the world is now even better, thanks to an improved design by Phillips. A high quality, precision instrument. Suitable for a variety of livestock. Dosages easily adjusted in seconds, for an economic and efficient use of drench. Quick fill for a speedy operation. Specially designed anti-spin nozzle. Comfort grip gives convenience for the operator and ensures animals are treated with minimal fuss and effort. Rear inlet valves for easy cleaning. Suitable for conversion to injector. 1ml graduations

20ml Auto Drencher complete with Feed Tube 441 053

20ml Auto Drencher complete with 2½ L Container & Harness 441 004

2½ L Container & Harness 574 508

Injection Attachment (luer lock) 573 528

Spares Kit (minor) 576 615

Spares Kit (major) 576 612

B 30ml Auto Drencher

Doesn't waste a drop of drench. Manufactured from high grade plastic for a robust construction - this drencher is virtually unbreakable. Bite resistant metal nozzle, adjustable for comfortable drenching. For administering oral animal health products to a variety of livestock. Removable cylinder makes cleaning and servicing easy. 2.5ml graduations

30ml Auto Drencher complete with Feed Tube 440 048

A 60ml Auto Cattle Drencher

Gives an accurate dose every time with the minimum of fuss. High grade plastic construction - this drencher is virtually unbreakable. Bite resistant metal nozzle, adjustable for comfortable drenching. Easy to adjust, clean and maintain. 2.5ml graduations.

60ml Auto Cattle Drencher complete with Feed Tube 440 036

Spares Kit 576 646

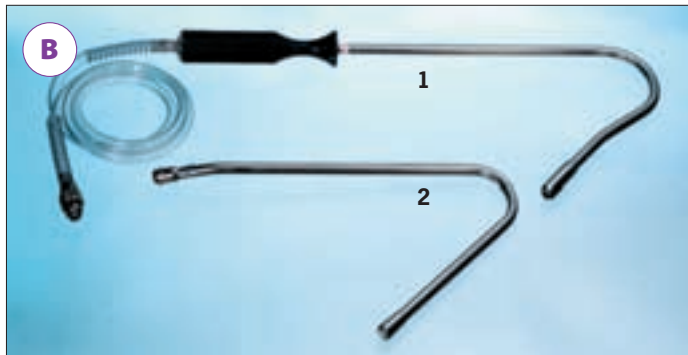

B Hook Dosers

For use with drenchers. Gives greater operator flexibility and comfort during drenching.

1 Hook Doser
for 20ml, 30ml & 60ml drenchers
Complete with flexi tube. 440 140

2 Hook Nozzle
for 20ml & 30ml drenchers 440 061
Hook Nozzle
for 60ml drenchers 576 655

C 150ml Non Auto Cattle Drencher

Suck up the drench through the nozzle, set the dose and get to work - one of the easiest and fastest drenchers to use. Clear plastic barrel and easy dosage settings. Bite resistant metal nozzle. Easy cleaning and maintenance. 25ml graduations.

150ml Non Auto Cattle Drencher 439 034

Spares Kit 576 636

D 25ml Auto Drencher

Economic drencher made from high quality plastic for oral dosing of sheep, goats etc. For use with most oral drenchers. Non-serviceable. 2.5ml graduations.

25ml Auto Drencher 439 046

E Ezi-Grip 12.5ml Drencher/Vaccinator

Easy to clean, comfortable to use. Easy and clear dose selection. Lightweight, ergonomic design with variable dose rates and interchangeable nozzle assemblies. Suitable for cattle, sheep and pigs. 0.5ml graduations.

Ezi-Grip 12.5ml Drencher/Vaccinator 532 420

F 12.5ml Auto Drencher/Vaccinator

A versatile instrument, suitable for low volume drenching of sheep and lambs and injection of cattle and other large animals. Simple to use. Durable plastic and fully serviceable, a robust construction provides accurate and reliable dosing. 1ml graduations (1ml - 12.5ml)

12.5ml Auto Drencher/Vaccinator 440 097

NJ PHILLIPS VACCINATORS

A range of precision vaccinators, giving highly accurate doses for the mass treatment of livestock.

Auto vaccinators are constructed with high quality material and will last for years. Options of bottle attachment (draws vaccine from a bottle/flexible pack) or draw off tube assembly.

Luer lock fitting with needle lock avoids accidental dislodging. Can be sterilised without dismantling. Rugged construction gives reliability and long life.

A Ezi-Grip Vaccinator 5ml

Easy and clear dose selection, easy to clean, comfortable to use. Lightweight ergonomic design with variable dose. Suitable for cattle sheep and pigs

Ezi-Grip 5ml Complete with bottle attachment. 532 400
Variable dose range with bottle mount.

Ezi-Grip 5ml Tube Feed Vaccinator (not illustrated - Same design as 532 410 above but without bottle attach).

B Repeater Vaccinators

Easy and hassle free vaccinators. Fill direct from the bottle, set dose and start injecting. Easy and clear dose selection, easy to clean, comfortable to use. With ergonomic fingertip action. Built in needle magazine in handle for convenient and safe storage. Draws straight from the vaccine bottle or pouch and requires no feed tube or back pack.

25ml Repeater Vaccinator 529 175
0.5ml graduations

50ml Repeater Vaccinator (not illustrated) 529 606
1.0ml graduations

Long Reach Flexi Injector

(not illustrated)

For arm's length injection of animals. Approx 40cm. Can be used with most Phillips vaccinators. 440 144

C 2ml Auto Vaccinator with Bottle Attachment

Proven design, tested and trusted to give an accurate vaccination for years. Suitable for iron injection. Calibration range 0.5ml to 2 ml. 530 062

2ml Auto Vaccinator

(not illustrated)

Suitable for all types of vaccine and livestock. Calibration range 0.5ml to 2 ml. Complete with feed tube. A robust precision instrument from Phillips.

2ml Auto Vaccinator 530 153

D 5ml Auto Vaccinator with bottle Attachment

Requires only gentle squeezing action to administer doze. Sterilisable without dismantling. Luer lock to secure needle. Calibration range 0.5ml to 5ml. 531 091

E 5ml Auto Vaccinator

Calibration range 0.5ml to 5ml. Complete with feed tube.

5ml Auto Vaccinator 531 108

F 5ml Semi-Disposable Vaccinator

One of the most popular plastic vaccinators in the UK. High quality, precision Phillips vaccinator. Lightweight and economic automatic vaccinator, giving accurate administration of vaccine. Complete with draw off system.

5ml Semi-Disposable Vaccinator 532 058

STERIMATIC

- a unique system
which protects
and cleans needles

**The safer, hygienic and
economical way to inject all
livestock.**

Helps protect livestock against
cross infection from damaging
viruses and bacteria.

Laboratory tested and used
extensively across the world, the
Sterimatic System has proved
to be effective on a wide range
of animals and poultry.

A Cox 5ml Sterivax Pack

The Sterivax Pack combines high quality
Phillips vaccinator with a Sterimatic Needle
System, to give up to 300 automatically
disinfected and accurate injections.

The Sterimatic Needle System includes a
Sterimatic sleeve and Stericaps - The
Sterimatic sleeve is a retractable sleeve
which fits onto the syringe and around the
needle, helping to protect it. The Stericap
is a precision moulded plastic container,
which fits into the Sterimatic sleeve and
contains foam soaked in disinfectant,
which cleans the needle as it's used.

The needle is protected before use and
automatically cleaned as it enters the
animal, passing through the Stericap.

Benefits of the Sterimatic System:

Increased safety for the operator - from
fewer needle stick and scratch injuries.

Healthier livestock as a result of reduced
abscesses and cross infections between
animals.

Sterivax Pack comprises:

Phillips 5ml semi-disposable vaccinator
Draw off system
1 Sterimatic sleeve
3 Stericaps
3 18g x 1" needles

Cox 5ml Sterivax Pack **530 311**

B Refill Pack

Comprises:

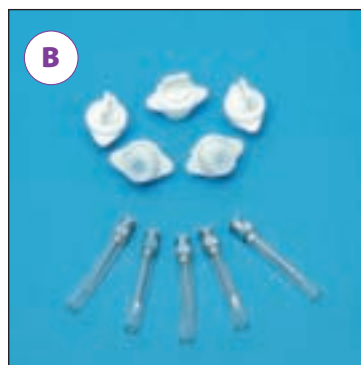

5 needles and 5 Stericaps **530 190**

Multipack (not illustrated)

Fitments for injectors, 5 needles
and 5 Stericaps **530 177**

Short Sleeve (not illustrated)

For Phillips 2ml and 5ml non-disposable
and disposable vaccinators. **530 232**

A Sterile Disposable Syringes

Monoject. Ideal for farm and veterinary use. High quality syringes and individually sealed. Manufactured by Kendall to the highest European standards. Easy to read markings. Precision pistons give excellent control and ease of use. Luer fittings.
